## where to out good milk. 🐇

As fresh, rich and nutritions milk se oan be found anywhere in the United States, not excepting the Blue Grass region of K-ntucky, is to be obtained in the Truckee valley about Reno. There there are thousands of scres of luxuriant a fails, which produces the finest milk in the world. Upon it hundreds of cows fatten. Many of them are of an imported stock and the farmers are able to furnish Virginia City with a large amonus of the purest milk and oream.

But the Chronicle, of the 2d, re ports why it is not done, and improvos the opportunity to lecture its ontizeus a luttle. It says:

And yet they complain that if they bring their milk here, they counci sell it One farmer, who made the experiment, brought twenty five cass here at two or three different times, and did not dispose of enough to pay his expenses. He stated that the people in Virginia City did not seem to know what go d milk was, and that they were regularly supplied from dairies in town or at the out

If sufficient inducements were of fored to ranchmen from the Truckes, that they sould be able to sell their milk to oustomers here, there is no reason why each morning's train should not bring enough of a fresh, awest quality so supply and ordinary demand

Such a trade would also cause an additional supply, for after the far mera found that they could always sell their milk they would pay more attention to the business and increase the number of their cows if neces-

Almost ali large cities are at least partially snoplied with country milk brought in fresh on the early morning trains.

Which party is to have a majority in the Senatary and After the sin of March next? The Demo rate, of course. The Republicans have had complete coultral of the Seaste since the reliel exists in the Winter of 1861. During this long period the Senate, with the exception of the has three years, the been the rolling branch of Congress and a deminating factor in the G vernment. At through the Administrations of Lin-coln, Johnson and Grant the Repub-lican majority to the Squate exerted a commanding and at times in irre-sistille influence to the party. This majority, which stood eight years ago at more than five to one, has ful-ion away almost to nothing. The becate continue seventy six members. The terms of twenty-four expire with SATURDAY, JULY 20, 1878. this Congress. Of the remaining fifty two who hold over twenty nine, counting D. vin Oavis, and Demograte.

and twenty three, including Booth and Christiancy, are Republicans. The Democrats, therefore, will have a majority of six of those who hold over. Of the twenty four benators who go out in March, eight are Dem ocrats, namely Barnum, of Connections; Dennis, of Maryland; McGreery, of Kentucky; Voorhees, of Indians; Armstrong, of Missouri; Merrimon, of North Circlina, Gordon, of Geor-gia, and Enstis, of Louisians. There is no doubt that in six of these States Democrats will be elected. It is not quite certain about the othe two. Republicans go out.

WE WILL CLASSIFY THEM

Under three heads, those cases where Democrats are sure to be elected those where Republicans are sure to be elected and those which may be regarded doubtful. Six will certain by be succeeded by Democrats, viz Spencer of Alabama, Dorsey of Ar-kansas, Conover of Florida, Mat thews of Ohio, Sargent of California an'i Mitchell of Oregon. Six will just as surely be succeeded by Re-publicans, viz. Morrill of Vernout, Wadleigh of New Hampshire, Oglesby of Illinois, Howe or wiscons.
Ingalia of Kiness and Jones of Nevida. So far the tally is even in remaind to new Senators. If there is a gard to new Senators If there is a, shade of doubt as to the results we have predicted, the chances for un have predicted, the chances for in foreseen changes are about the same in each party. Of the sixteen Republicans who go out, four remain to be considered. They are Conkling of New York. Cameron of Poun sylvania, Patterson of South Carolina and Chaffee of Colorado. There is a strong probability that Cinkling will be referred, and in view of the will be re elected, and in view of the trescherous conrectof the Democratic State Convention of Pennsylvania and the refusal of the R-publican Convention to touch Hayes, the way to the Senate seems to be respensed for Cameron The so-called Demo crats of South Carolina can hardly ful to elect a Senator of their peru ime type, while Chaffee will probably be succe⊶iléd by a man who beli⊬yes that Democracy means the condomna tion rather than the condonation of

GREAT FRAUD OF THE AGE.

If we are right in these estimates, how will the next Senate stand us between the two parties? Twenty Out of all the myriad lights in the nine Democrats hold over Of the six of the same party are sure to be returned. The Democrats are certain to get eight of the seats now or annied by Republicane; this makes a total of forty three. Twenty three Republicans hold over Of the eight Democrate whose terms expire in March, we allow the places of two to be filled by Republicans. Of the sixteen Republicans who retire in March, we concede that they will reelecterght. This gives an aggregate of thirty three. The Gold Hill News says John P Jones, Nevada's Senator in the United States Congress, will return to his home in Gold Hill very soon now: It may be said without fear of contradiction that no previous Senator of this State has earned the gratitude of his constituents, so fairly or in such measure, as Mr. Jones. Our wealth, and this man by the persistent, energetic labor of nearly six years has added very essentially to the value of their material produc-Through his efforts the glittering treasure which we extract from the depths of our mountains, has been raised above the level of mere merchandise, and converted invered, spending time and his own money lavishly, until friends were gained, and finally the silver bill was passed and the wealth of our mines made available for coinage. The public services of our Senator entitle him to a special recognition at our hands. In all probability arrangeand friends in Gold Hill can pay him more graceful compliment then this, by calling on him after his ar rival and expressing their apprecia-tion of his Senatorial career and his efforts and works in our behalf. His labors have resulted to the benefit of the whole country, but we, or and are the greatest gainers. The election United States Senators, walke of grain or any other product to take the place of J. P. Jones, of the country, is a public benefactor, whose term expires Mirch 31, 1879, and one to take the place of Sharen and its unjust depression, and dereves our thanks. There will be no Journal issued from this office to morrow morning, being in accordance with the usual custom of the fraternity.

### Dr. Dawson's Address.

The Gold Hill News, of Tuesday, makes the following mention of Dr. Dawson and the address delivered by him before the Medical Society is at.

Last evening the public were in vited to meet the members of the Society in Pythian Hall. Old Fellows' building. Virginis, and listen to the address of Dr. Dawson of Reno. The hall was well filled at the appointed time; by a very intelligent audience. The address should be given to the public, but it is too lengthy for our columns. To at tempt to give any idea of it would do the speaker injustice. The doctor occupies a position well in the way of his profession and his address van of his profession and his address paid a glowing tribute to true members of the medical fraternity and the adva :ce of medical science at the present time, while the dissection he made of empiricism, and the charletans showed both up in toeir true lights and exposed their harmful us-tures and utter worthlessness.

Dr. Dawson showed to the people most conclusively the necessity of their standing with learning and soi enes in the contest now being made to rid the contest now being made to rid the communities of quades and pretenders. He advocated the necessity of just such an organization individual matter with them, and as hid been form d by the fraternity. that they as a whole might withstand infrasions against which they ware individually incupable of successful opposition. Besides, such an organization would help to educate the people; and this was after all the very heat remedy.

### Indian Alarm at Camp Bldwell.

Mr. Irvin Ayers has just received the following letter from Capt. Kistlor, his chief clerk, which shows that the situation looks serious there:

CAMP BIDWELL, June 26, 778. Chief Naches, who escaped from the Indians, came to White Horse and reported that the Indians' plan was to strike Surprise Valley. This in lace the people to arm themselves. To aid in this I or level, to day: one dozen Henry rides to come by express. I wish if you are at hand you would superintend the shipment of these arms, as well as all other ammuni-KINTLER tion in store.

Mr. Ayers came up from San Francisco yesterday, and brought a lot of breech loaders with him, with which he intends to arm an escort, which he proposes to send! out with his teams from this place, now about ready to go with government freight and merchandise for his own store.

### NEWSPAPEES AND CANDIDATES.

Nowspapers are private property, conducted by their managers as idg announcements and publishing communications calculated to further their interests. The space in a news paper represents a money value; no merchant or business man would think of asking a newspaper to advertise his business or guods without paying for the same. Subscribers expect and are entitled to a certain amount of reading matter of general interest. Oilles seekers destring their claims accounted should comunder the same footing as the mersale. He alone is the party to be ben fitted, and should pay for the benefit derived as for any other val uable thing. The ordinary party or independent newspaper has pichty of news is of sufficent importance to gratuitons work to do for political pantis as a whole, without advocating the claims of individuals on purely partisan grounds or as a mat-ter of courtesy. Politics naturally consume a large share of a newspaper's space and attention. A newspaper that keeps its readers fully adand out of the State has an abundant task to perform, without puffing condidates. It is said the laborer is worthy of his hire. The newspaper is the vehicle by which the public can be most realily reached, and, as such, it should be paid for its ser vices. It requires not only time and money but brains to run a news paper. In these degenerate days newspapers are run, not for glory. but for money. It is purely and strictly a matter of business. This sentiment is rapidly gaining ground

BALT RIVER, ARIZUNA. It was very long supposed that the brackishness of Salt river, Arizons, was caused by the stream running over a bed of sait somewhere along its course. Its waters are pure and miles of where it empties into the Gils. Fifty miles from its innetion with the Gila there comes into it a stream of water that is intensely salt. This stream pours out at the side of large mountain and is from twenty to thirty feet deep. It is very rapid and pours into Salt river a great volume of water. Here could be easily manufactured sufficient salt to supnecessary would be to dig ditches and lead the brine basine to the near led to immense eveporating ponds It is supposed that the interior of the mountain out of which the stream flows is largely composed of rock mait.—Syracuse Standard
